

HotWeb Rentals Holiday Property CMS

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A "for rent by owner" site, particularly suited to holiday rental properties. Provides property owners the ability to list their rentals, along with up to 6 images. The site administrator must approve new listings before the property is shown "live" on the site. Member registration involves activation via email and once a property is approved by the administrator, owners can log-in and update their own listings at any time. Property enquiries go directly to the owner's email address. Dynamic pages can be created to suit your individual needs (an unlimited number of information pages can be added), using a WYSIWYG editor interface. All property thumbnails are automatically generated when images are uploaded (no need to fuss about re-sizing images). The RSS feed automatically lists current properties and advertising such as Google AdSense can easily be added. Made in Dreamweaver (using DW Templates) and uses a Microsoft Access database.
