

How to Build a Low-Budget Web Service with Classic ASP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This article illustrates how to create a news feed Web service in classic ASP. The Web service created is extremely light-weight, requiring minimal Web server requiriements. Basically, it uses a light-weight, cilent-side JavaScript file.
