

How to create and retrieve cookies using ASP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Cookies can be used to remember things about a user when they come back to your site. Cookies expire after a certain amount of time which you can set. Also, the clients browser must have cookies enabled for them to work. Here is a very simple example of creating a cookie and setting the cookie to expire in one year using ASP
