

How to use XLink with XML

Address	<code>{value_address}</code>
Contact Person	<code>{value_contact_person}</code>
Mobile Number	<code>{value_mobile_number}</code>
Email	<code>{value_email}</code>

XLink, an XML-related specification, lets you achieve dramatic linking effects in your XML documents. In this short tip learn how to include parts of other XML documents in your own XML through XLink. The code example demonstrates the technique.
