HTML code reduction

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script will open all HTML pages within the specified directory, reduce the file size of your html pages, and the files will be saved back. You may password protect the script, and it will allow a faster transmission of the page. A good script to learn how those task are perform.
