

# HTML Password Website Protector

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

HTML password protect, encrypt HTML files with 384 bit keys. Protect web page or entire website with a password. Encryption algorithm used is much stronger than the 128 bit cipher used in today's browsers and considered secure enough for online credit card payments. Option to enter the password only once for all protected files. Customizable encrypted files layout. You can use one or more passwords. Many additional security options available.
