HTML template engine library

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This library has been created with one goal in mind: easily create template-driven active web-pages. It allows you to: make your web-site template driven; insert active content (date, time, number of active users, use different templates, even change title), and enable or disable your web-site content.
