Mobile Number	{value_mobile_number}
Email	{value_email}

You can customize almost anything and it is also optimized for mobile devices (Android and IOS mobile devices such as iPad2, iPad3, iPhone, Samsung Galaxy Tab etc). It not only runs on those devices but it acts like a native app, you can touch and drag/rotate the Carousel just as you would a native app. Please note that we have tested it on IOS (iPad2 and iPad3) and Android (Samsung Galaxy Tab) and the performance is really good especially on the iPad with IOS5 or higher (the canvas on this devices is hardware accelerated). This HTML5 Canvas Carousel Gallery can have any image presented in any way you want: horizontal, vertical, oblique, also it has unique presets with pre-defined movements and presentations. You can also set the colors of the buttons, scrollbar preloaders border etc, basically the entire color and graphics theme can be modified. Moreover, all the buttons and scrollbar are optional.
