Email	{value_email}

The HTML5 Gallery / Banner with Buttons can be used as a gallery or even as a banner rotator. This gallery runs on PC but also it is 100% mobile compatible . We've also tested it on IPAD3 and it runs great, you will interact with it as you would with a native app. This gallery includes 16 transitions, six of which are simulating the Ken Burns effect. These are working really smooth and were implemented using the new HTML5 canvas element.
