

HTML5 Gallery Banner with Thumbs

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Fully XML driven this makes it really easy to install and maintain Support for multiple instances in the same page: you may have as many galleries as you want in the same page and each one of the galleries / instances has its unique set of images and settings. Buttons are optional and can be positioned anywhere by setting the x and y position for each of them, this is a unique and useful feature. The entire color theme can be modified and also the graphics theme can be modified, each button can have different graphics, this mean that you can add your own skins, the buttons size does not have to be specific it will adjust based on the graphic (.jpg or .png) file used. Support any type of image format (landscape, portrait or whatever)!
