HTML5 Geolocation

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

It is not just a HTML5 geolocation! This is a powerful script that allows you to monitorate your visitors' geolocation, thanks to php – javascript – html5. You can choose among two different types: A 3D animated version; A 2D static version. Easy to custom, thanks to the offline documentation and to the offline generator code.
