

HTML5 Video Background WordPress Plugin

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

HTML5 Video Background is a WordPress Plugin that allows you to add video to your site's background with a single javascript call. The script automatically chooses what video format to use and checks if your site is being seen from a mobile device and shows poster image if it isn't possible to have video playing as a background. It has also a flash fallback if user system doesn't support HTML5 video tag.
