<b>Email</b>	{value_email}

The HTML5 Zoomer Plugin FWD is a great image navigator and a panning tool for displaying large images. It is compatible with all major desktop and mobile browsers. It is a powerful image viewer prepared for showcasing products, displaying maps, and any other images, with its zooming, panning, dragging, navigation controls, scrollbar, zoom buttons, and highly customizable markers. It is very easy to configure and maintain it in XML and also, as a plus, you can open it in a lightbox window just like the jQuery plugin. You can use any size for your content and the loaded content will adapt based on the plugin size specified in the configuration XML file. This feature makes it a perfect choice for any project that you have in mind. It was coded and optimized for mobile devices and it is 100% mobile compatible and of course it will run just as great on PC. This HTML5 zooming and panning plugin can be embedded in WordPress.
