HTMLCAL is a Web calendar maker and editor that lets you maintain a group calendar for your Web site or intranet. This software will let you maintain live calendars on your site that anyone can view or update from any Web browser. Or, you can use the software to generate the calendars on your PC, which you can then post to your site. Its typical applications include Coordinating meetings or projects, Scheduling vacations or conference rooms, Lunch menus, Church events, and Listing community events.
