I-Load by RADactive is an ASP.NET control uniquely composed of pure C# managed code. Its installation is very simple and doesn't require any particular admin permission (R/W on the application folder). Efficiently and quickly upload images to the Internet or post-processes previously uploaded images, without requiring any coding. The process of uploading images from your hard drive is a guided, simple visual process needing just a few button clicks. It provides you with complete upload information including the bytes loaded, the time remaining, percentage of completion. You can drag and drop the cropping area to select and edit the images that need to be uploaded. The images can be resized (WYSIWYG Image Processor) based on the criterion set on the program,you can apply a watermark, etc. At the same time, you could preview the edited images as thumbnails to gain a final idea of the resultant picture. Available I-Load 2008, for VisualStudio 2003, Express, 2005, etc | ASP.NET 1.x - 3.x
