IBILL Processor is a backend cgi system for integrating your membership site into any IBILL account(s). Its streamlined code is capable of delivering fast results on even the largest databases without the hassle of installing DBM modules. Capable of handling an unlimited arrary of WEB 900, RECURRING, NON-RECURRING billing schemes in a single installation. Automatically manages your password database and pincode files so you can focus on marketing and designing your site. Conventient protected administrative interface allows you to override the automation and add/delete users manually. Complex fraud scrubbing allows you to sleep safely as it is impossible to hack through our system with unauthorized access. It is also compatible with websites running multiple billing software such as DMR, ATS, etc. and has even more enhanced security features to block hackers.
