ICode+Paypal - Add Paypal support to your Icode Everest Shopping Cart

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

If you're an ICode Everest user and you sell your products through ICode's shopping cart, this is the product you've been waiting for. ICode+Paypal integrates seamlessly with your ICode Shopping Cart. It adds a new option in your shipping pages for your customer to select Paypal as a payment method opposed to using a credit card. Once Paypal is selected by your customer, when he presses continue in the Shipping page, instead of seeing the Validation of the Credit Card, he will be redirected to a Paypal page where he will see the details of the invoice he's paying for, and he'll be able to pay for it by just logging in with his Paypal User and Password. Once the payment is acknowledged, he'll be redirected back to your site, where the Sales Order will be generated in your Database, and the customer will see the Invoice details, just as he'd see now if he used a Credit card to pay on your site. Icode+Paypal includes seamless integration with IPN and Website Payments Pro.
