iisPROTECT is a high performance user authentication, password protection and member system. It is a complete turn key solution which requires no programming or scripting and is fully functional within minutes. It allows you to protect all web site files including images, databases, html, ASP etc. It features: Protect entire directories, users / groups independent from Windows accounts, complete web administration, prevent concurrent logins and password cracking attempts, and set quotas on hits, logins, kb per user. New in version 2.0: seamless integration with iisPROTECTcc and iisPROTECTvideo.
