

Image Etc. Rotator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Rotate any kind of images, ads, or banners and at any timings you need! Rotate images by day of the month or by day of the year, by hours, minutes, seconds, milliseconds, and in order! They can rotate automatically before or on page load only. A random rotator that cannot pick the same item twice in a row comes with this! Each image can be a different link of its own, so when each image is clicked on, it leads to a different web page elsewhere if you wish. Title text can appear for each different image when the images are hovered over with a mouse if desired. Disable or keep the features you want. As many rotators can go into each page as you want. Rotate all your own content, yourself!
