Email	{value_email}

Tired of editing all you images in Photoshop and adding reflections to get that web 2.0 eyecandy reflection ? Well - With this script you just have to add a class to any picture on your website and the pciture reflects! Easy and nice! Features Fun and easy to implement! Just add class="reflect" to your images Automatically blends into background colours or images It's easy to vary the reflection height and opacity Can respond to user actions through Javascript Degrades in older browsers; they won't notice a thing! It's smaller in size than most images; under 5KB!
