

Image Thumbnail viewer II

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This image script loads and displays a larger image inline on the page when a thumbnail is clicked on. Great for letting visitors preview from many images then select the one of his choice to view all on the same page. With features like fade-in effect and optional image preloading, this thumbnail viewer script is also a big thumbs up.
