

Import CSV to HTML

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The author writes "A CSV (Comma Separated Values file sometimes referred to as a flat file) is essentially a text file that has a comma delimiter between the table values and a unique line for each observation. While this is usually a means by which data is transferred from one database to another by itself can be used as input to an asp document." This example will show how to take virtually any CSV file and write it to an html table using ASP.
