

# Import Gmail Contacts

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Written in PHP and using cURL, this script imports the names and email addresses from your gmail account. When used with our Newsletter Script you can Create and Send an HTML Email Using FreeWebScriptz Import Contact Script easily! An HTML form is often used in email marketing to generate a greater response from potential customers.
