

In-place editing with contentEditable property and jQuery

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Firefox3 supports the “contentEditable” property. Setting this attribute to “true” allows you to make parts of a document editable. This attribute was already supported by IE6/7/8, Safari, Chrome and Opera. So now we can start using it in our applications.
