Infinite FX External Links

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script allows you to retain traffic at your site when you have lots of links to other websites. Simply send each link through this script and it'll create a frame with the new site in the bottom portion of the screen, and your logo/page links, etc in the top part. Contains all instuctions in a Readme file. Very easy to set up and can be customised to integrate seemlessly into your own site.
