Innovate Send-Any-Form PHP Version

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Send-Any-Form PHP form processor has all the functionality of its Perl based counter part. The script can process and forward any form it is sent and redirects the user to a page of your choice or simply confirms the output using its built-in standard page. Send-Any-Form PHP comes with a Javascipt based form generator and the original Perl version of send-any-form.
