We offer high quality, original design for the internet. It is our belief that web pages should not just be practical and functional, they should also be beautiful. Many websites will claim that you can have a great website in minutes. This is not true - creating a great website requires work. We believe in putting the creative work in, to give you an original design for your site that you will love, and which will be an asset for your business. All our designs are 100% original and customized to your needs - we do not use templates. As well as custom design we offer web programming services using PHP, SVG, javascript and Flash Actionsript. We specialise in custom-made sites, including static sites using html, and design for dynamic sites using content management systems such as Joomla, Xoops and Drupal, and also e-commerce sites using systems including Zen Cart and CubeCart. We can also offer an installation service for these systems.
