

Installing PHP on Windows 2000, with mySQL and Apache

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A complete tutorial that covers installation, setup and testing of Apache 1.3.33, PHP 5.02 and mySQL 4.0.23 on windows2000 pro. The guide is also known to work for XP, and should work with lower versions of windows, too. There's a user comment area so if you have any problems I'll try to give help where I can.
