

Integrate The Authorize.Net AIM API with Python 3

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This tutorial includes working code for processing credit card payments through Authorize.Net's Advanced Integration Method (AIM) API. It demonstrates how to process sales and other transactions as well as how to handle successful and declined transactions as well as processing errors.
