IntelliLink Pro is a link exchange management script that will increase the traffic to your site with very little work on your part. If you have trouble deciding which links should get the best spots on your site, if people stop linking to your site because you don't send them enough traffic, if you just don't have time to edit your HTML pages every time you need to add a link, then IntelliLink Pro will do all this for you, and it will do it better than any webmaster could do by themselves. The system makes sure sites sending you traffic get traffic back from you, and it doesn't send traffic to sites which don't send you any. You decide where on your site links should appear and IntelliLink Pro will take care of the rest. It even alerts you of possible cheaters. Once you start running your sites' link exchanges with IntelliLink Pro, you'll never want to go back to the old way. You Will receive higher levels of traffic.
