Internet Media Manager

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

The Internet Media Manager is a web-based database application that allows webmasters to centrally store their images and videos to be served on their website(s). It provides a Youtube-like interface whereby users can simply copy and paste code snippets to embed images and videos into their web pages. It also provides a photo gallery component that allows users to easily embed a gallery of images into their web pages by simply copying and pasting a snippet of javascript code.
