Intro to VBScript

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This introductory guide presents 5 useful VBScript tricks and examples. IT shows you how to detect the IP address of your visitors, detect the user's browser, how to include files in your ASP pages, how to force the script to continue with the next statement when it encounters an error, and how to make subroutines.
