

introzip - Serve content from zip files

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Serve static pages directly from zip files, while not a great idea for pages that are frequently visited, it is convenient for intranet sites or home networks where you'd like to make ebooks, javadocs, etc.. available. (or make uploading such information trivial, just put a zipfile in it's directory and be done with it)
