Mobile Number	{value_mobile_number}
Email	{value_email}

The ionCube PHP encoder 5.0 offers superior script protection with no compromises for PHP4 & 5, offering optimised compiled code, and files time limited and locked to specific machines. Run encoded files on Linux, Win, Solaris, FreeBSD, OSX and more, faster than original source, and deploy without editing the php.ini file! The Win32 GUI offers the most richly featured encoding environment available, with optional extras including auto FTP, archiving, & automatic installer creation via our IPF product.
