IP2Currency Plugin

Address {value_address}

Contact Person {value_contact_person}

Mobile Number {value_mobile_number}

Email {value_email}

The IP2Currency plugin allows visitor to view the currency value on the your blogsite in their localize currency (homeland currency). There are no programming works involved, but a single shortcode is all you need to produce the result. And, the best part was the result will be automatically determined by our server based on the origin of the visitors. Key Features: - Automatically determine the origin of visitors by using the geo technology (powered by IP2Location.com) - Automatically determine the commonly used local currency. - Autmatically return converted amount using the latest exchange rate. - The exchange rate was getting from a reliable data source and was daily updated. - Ability to support multiple base currency. - Displayed the currency symbol of the converted value.
