<b>Email</b>	{value_email}

IP2Location Country Blocker allows user to easily block visitors from accessing your frontend (the blog pages) or backend (the admin area) based on their country. This plugin uses IP2Location BIN file for location queries that free your hassle from setting up the relational database. This plugin allow you to block multiple countries with the option of return 403 error and page redirection. Free BIN database file can be downloaded at <http://lite.ip2location.com> and used in this plugin. For accurate result, you can just replace the free BIN database version with the commercial download without the need to reinstall the plugin.
