<b>Email</b>	{value_email}

IP2Map tracks and displays the 100 most recent visitors browsing your blog site. It displays you the information of where the visitors come from (city, region and country) and the visiting time in an organized table format as well as a graphical map plot. This plugin is absolutely free, thanks to the geo location technology powered by IP2Location.com. Furthermore, there is no registration, sign up, programming or database installation are required in order to use this plugin. It just plug-n-play, as simple as that.
