IPSearchLight for ASP.Net and ASP Classic - Precise User Location Tracking

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The IPSearchLight Product Family includes a ASP.Net WebControl (C# or VB.Net), and an ASP Classic ActiveX Server Control (VBScript, COM Architecture). It precisely locates website visitors by country, state, city, latitude, longitude and even zip code. Users are tracked using a technique that is non-invasive and undetectable - it uses IP address alone. IPSearchLight is beneficial for localization, targeted advertizing, statistics, security and fraud prevention.
