Email   {value_email}

iScripts Backuper is an innovative online data backup platform that enables users to create their own online data backup service. The software platform includes both private branded server software and desktop application for the end users. This entire system allows entrepreneurs and service providers to offer their own data backup service to consumers and small businesses. The business created using this proven platform would be similar to mozy, carbonite, iDrive etc.. The desktop client allows end users to backup in a secure, automated manner to YOUR server.This software clone user data to any PC after a computer crash through an internet connection.
