Mobile Number	{value_mobile_number}
Email	{value_email}

iScripts MultiCart is the original multi vendor shopping cart script. It is a unique shopping cart supporting multiple vendors and a single storefront. It enables you to create an aggregate store or marketplace like etsy. These mechanisms work well in the niche vertical markets with fragmented vendors with low volume. The store operator provides operational, marketing support in exchange for a commission. The MultiCart script is an entire business model in a script and can be installed in few minutes. Vendors can add items, update price, upload pictures etc..When end consumer purchases something from the store vendors get notified with shipping address and shipping instructions. Once customer receives item you, store operator release the money to vendor less commission. This script supports payment through most major gateways and real-time shipping calculations. Entire script is open source, so you can customize as required. Optional private branded mobile apps for sellers and buyers
