

J-LiveSupport is a LIVE CHAT (HELP DESK) WEB application

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

J-LiveSupport is a Live Chat SOFTWARE for web sites to do live help and live support chats with visitors. Your website visitor clicks on the Live Support button on your web page, which opens the Visitor Popup Messenger in the visitors browser. The visitor fills in the information fields, adds a question, and then clicks on the "Start Chat" button. You receive the visitors call, a private chat window opens up, and you and your visitor communicate with each other via real-time text messaging. J-LiveSupport is build on open and proven technologies. It allows us to keep prices low and provide you with a possibility to integrate the Live Support with a popular instant messenger (IM) Jabber. Now you can be online with your site visitors 24x7, even via your mobile phone. J-LiveSupport use a Jabber IM as your operator software.
