JOODA is an intergreted development environment for Java, written in Java. With a look & feel inspired by the renowned Smalltalk-IDE Envy/Developer, class based code browser, and on-the-fly code execution, JOODA is designed for object-oriented development from the ground up. Features include: Syntax highlighting, On-the-fly code execution, Multi-language support (currently only German and English), Cross-platform (Win98 & Linux currently tested), Both file- and class-based editing, Project management features.
