Java RSS News Ticker Applet

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

How would you like to provide your website visitors with live updating RSS news from any RSS feed that attracts and motivates them to come back and visit your site again? Our Java News Ticker is the gadget your site needs to keep visitors updated without having them to refresh the browser to get the latest news and also with a nice and customizable presentation. The main features of our new ticker are: - live auto-update in real-time - RSS compatible data provider - optional fixed titlebar - clickable news headers - customizable width and height - customizable font family, size and type - customizable colors for foreground and background - customizable rotation speed - customizable rotation direction - mouse rollover effect
