

JavaScript Base64 Encode and Decode

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This object can encode and decode data in base64 format in pure JS. It can take a data string and encode it using the base64 algorithm. The object can also do the opposite, i.e. decode base64 encoded data and return the original data string.
