JavaScript DataView- Webix DataView

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

DataView enables you to place on the page as many objects as you wish while maintaining a high level of performance. You can create various CRUD operations easily with DataView by making a few simple manipulations. DataView helps you group information rationally within a single container. Now you needn't look through a jumble of information to find what you're looking for. Just click on the appropriate group and enjoy. Thanks to using dynamic data loading DataView allows you to load only the information you require at any given moment.
