

# JavaScript dropdown list menu to switch any page

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

In this article we are going to design a JavaScript dropdown list menu to switch any page. Some time we have provided option to Select a desire option and load that a web page with respect to it. The Script we are going to design is very simple. First of all just design a select menu. All we have to do is design a form and a drop-down list box. Following piece of code will do it for you.
