

# JavaScript Email Address Encoder

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

If like me, you are fed up of receiving spam through your email addresses that are posted on your websites, then this is just what you need. Simply enter your email address in the spaces provided and click on the 'continue button' and your email address will be encoded in a Cut and Paste JavaScript ready for your to insert into your website.
