

JavaScript Status Text Clock

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Here we are going to display Text Clock at status bar of browser. First of all we have define variable `var currentDate=new Date()` and create a date object. Then define function `NumToText()` which take input as number which is output of method supported by date object.
