

# JavaScript Webix MultiView Widget

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

With this Webix widget, there is no need to open additional browser window. Now you can place different widgets in special panels displayed within one area. Users can quickly switch between these MultiView panels using the navigation tools provided. You can easily define the appearance of MultiView widget fully with CSS, which improves your SEO indicators and simplifies control of your widgets' visual parts.
