

# JFormMail - Free Java based WWW form processor

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

JFormMail is a java based form processor servlet which comes with has many formatting and operational options, most of which can be specified within each form, meaning you don't need programming knowledge or multiple servlets for multiple forms. This servlet derives all functions from Matt's FormMail and requires no HTML changes to be made on existing forms based on Matt's FormMail.
